Accelerate Your Clinical Trials

What if you could speed up clinical trials — with no unwanted side effects? How about managing and exchanging all of your study communication and documents through a single investigator portal while complying with all regulatory guidelines? And, what if you could lower your risks while lowering your costs?

Across the industry, companies are striving to find ways to improve operational efficiency, reduce costs and shorten the cycle time involved in clinical trials. IntraLinks® enables you to better manage the distribution, collection and tracking of critical information related to site recruitment, study start-up (SSU) and safety while also adding a layer of security to the process. From start to finish, IntraLinks’ Clinical Trial Portal improves communication, collaboration and document exchange between everyone involved in a clinical trial — from study team personnel and CROs to investigative sites and IRBs — to accelerate the whole process.

Clinical Trials

Simplify Site Recruitment
Significantly shorten the site recruitment process by managing the distribution and collection of the feasibility survey online in a secure, centralized location. Track the status of site survey completion on IntraLinks so you can focus on follow-up and get sites onboarded quickly.

Shorten Study Start-Up Time
Distribute and collect regulatory documents such as 1572s, investigator brochures and study protocols online to shorten SSU. Manage and track site status by keeping tabs on the completion of key regulatory documents.

Enhance Study Conduct
Amending protocols and sending safety notifications are crucial processes that must be handled without errors or delays; they can also be quite costly. IntraLinks’ Clinical Trial Portal is the single place of record for all study documents. Updating, altering, tracking and discussing new trial information on IntraLinks ensures everyone is on the same page at all times.

Manage Trial Information
Effortlessly exchange information among trial participants throughout the study. Create a single, secure repository for monitoring reports, data clarification forms, lab information, summary reports, patient diary data and adverse event reports.

Safety Document Distribution

Centralize Information and Speed Up the Process
Centralize SAE, SUSAR, IND, and ADR safety reporting on IntraLinks so information is immediately available to all parties who need it. Principal Investigators, IRBs and other stakeholders can be notified via email or pager alerts when a document is posted so they have instant access to information.

Ensure Security and Reduce Risk
With IntraLinks, you can control access to documents and reduce the risk of accidental disclosure to unauthorized individuals. Documents can be locked to prevent printing, saving and forwarding, and can be watermarked for additional security. And, IntraLinks provides robust, real-time reporting capabilities to help with compliance.

Provide Global Access
Organize all documents in a centralized online location for instant global access by everyone who needs the information. Real-time access reports allow you to monitor who has reviewed the information, how often, and when.

Moving your clinical study communications to IntraLinks can shave weeks off your study, save tens of thousands of dollars in shipping costs and enhance the security of your critical information.

99% Decrease in shipping costs*
85% Reduced document distribution and collection time*
33% Reduced cycle time from final protocol to first subject first visit*

Security
Our top priority is to provide you with the highest level of security, compliance and auditability for the exchange of your information, avoiding possible risks and exposure to your business. Our solutions adhere to industry-mandated regulatory requirements including SAS-70 Level II and ISO 9000 certifications. IntraLinks’ comprehensive approach toward security extends across our entire solution including the application, infrastructure and process.

Affordability
Offering a true turnkey solution, we require no additional hardware or software, no expensive training programs and no new demands on your IT resources. With no upfront capital costs, our Software as a Service (SaaS) business model provides a budget-friendly, scalable cost structure that yields returns almost immediately and continues through the long term.

Easy Implementation
With tens of thousands of implementations worldwide, we can get you up and running in minutes. Easy integration with your current software and internal systems ensures a seamless workflow. And as your business evolves, our solution enables you to easily add users, expand your uses and increase your volume of information to adapt to your ever changing business needs.

Cross-Organizational
Transforming the way organizations do business, we’ve created a way for you to collaborate on your mission-critical business projects with experts and colleagues regardless of their location, inside and outside the company firewall. Enabling you to not only do business more quickly, safely and efficiently, but also more profitably.

Service
Delivering a technology solution to extremely demanding clients, such as those in financial, pharmaceutical, biotech and legal industries, requires a tremendous level of dedication and unwavering commitment to our customers’ success. Offering a full-service approach, we’ll set up and manage your solution so that your team can hit the ground running. And we provide global 24/7/365 live support in over 140 different languages.

Expertise
For over a decade, we’ve been helping companies around the world exchange their critical information. With over 750,000 users across 90,000 organizations across the world, we offer solutions based on innovative best-of-breed technologies along with direct domain knowledge and best practices by industry to ensure you get the most value from your IntraLinks solution.

Global
At your desk or on your Blackberry, our solution is available in multiple languages. And with thousands of customers around the world using IntraLinks, you can be assured that we will manage your business globally. With personnel and offices in 16 countries on 4 continents and a growing list of leading enterprises around the world, IntraLinks offers international reach with customized support.

The IntraLinks Advantage
IntraLinks® provides enterprise-class solutions which facilitate the secure, compliant and auditable exchange of critical information, collaboration and workflow management inside and outside the enterprise. Our on-demand solutions help you organize, manage, share and track information, enabling you to accelerate your workflow, optimize your business processes and realize new profit potential.
