

Ask Link Saved Prompts

Accelerate deal execution with reusable AI-powered workflows.

Deal teams often find themselves recreating the same AI prompts and analyses across transactions, wasting time, creating inconsistent outputs and slowing down diligence. **Ask Link Saved Prompts** helps teams move faster by enabling teams to create, reuse and share standardized AI workflows across every deal.

Transform repetitive diligence into governed, reusable AI prompts that teams can save, share and reuse across transactions to accelerate execution and standardize best practices.

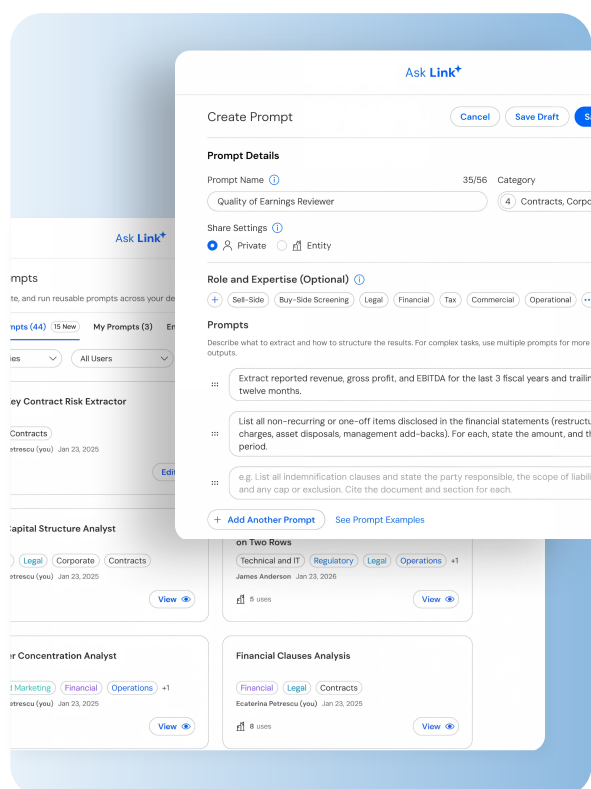

Simplify your deal process with Ask Link Saved Prompts

Features

- Create reusable AI workflows instead of rebuilding prompts from scratch
- Access a centralized library of personal and shared company prompts
- Configure prompts with customizable, business-ready outputs
- Execute prompts across multiple deals with built-in governance, ownership and sharing controls

Benefits

- Accelerate deal execution with standardized AI workflows
- Improve consistency across teams, transactions and outputs
- Encourage collaboration by sharing proven prompts and best practices
- Strengthen governance with traceable, repeatable outputs
- Scale AI usage from individual productivity to organization-wide workflows

Getting started: How Ask Link Saved Prompts works

Step 1: Create a saved prompt

Set up a reusable prompt by defining its name, category, instructions, scope and output format. Save it as a draft or publish it when ready.

Step 2: Discover and reuse

Browse the centralized prompt library to discover proven workflows created by your team. Adopt and customize prompts to fit your deal-specific needs.

Step 3: Execute across deals

Run saved prompts across one or multiple transactions with built-in status tracking and retry capabilities.

Step 4: Export and share results

Export results in business-ready formats to share with colleagues, clients and stakeholders.

Turn repetitive questions into repeatable AI workflows

Ask Link Saved Prompts helps organizations capture institutional knowledge, standardize best practices and build trust in AI-assisted diligence by:

Converting frequently used prompts into reusable AI workflows

Enabling teams to discover and reuse proven prompts through a centralized library

Supporting multi-deal execution with traceable outputs and built-in governance

Promoting more consistent, repeatable AI-assisted diligence across the organization

See how Ask Link Saved Prompts can eliminate repetitive work, standardize AI-assisted diligence and accelerate deal execution. Contact your customer service representative to learn more today. intralinks.com/contact
