Ask Link for FundCentre AI™

Deliver the data and transparency LPs expect with AI-assisted workflows.

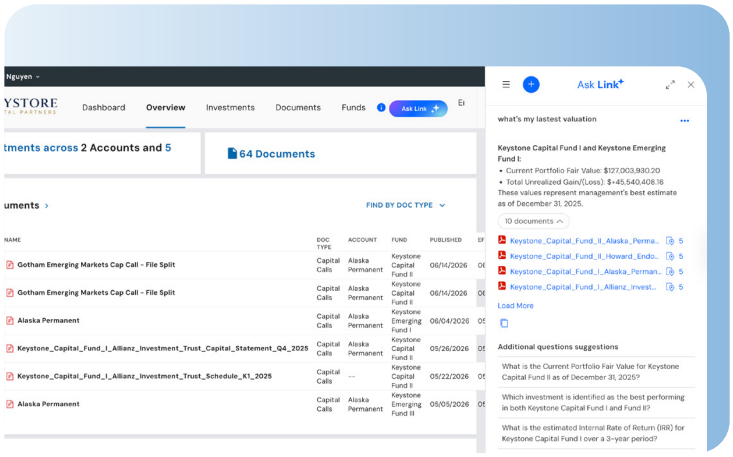

Limited partners (LPs) are demanding more data, frequent reporting, greater transparency and faster access to fund information. Yet the answers they need are often buried across large volumes of fund documents. This creates friction for both LPs and general partners (GPs), resulting in time-consuming document reviews, frequent information requests and ongoing back-and-forth communication.

With Ask Link, Intralinks' proprietary artificial intelligence (AI) assistant, LPs can ask questions and receive fast, source-backed answers based on the fund documents available to them. Here's how Ask Link transforms your LP experience from manually reviewing reports into a simple, self-service workflow.

Ask Link gives LPs easier access to information and a more efficient way to engage with shared documents.

Faster LP document review

LPs can ask specific questions instead of manually searching through multiple files

Sourced answers

Responses include source references for easy validation.

Intuitive investor experience

LPs can ask follow-up questions and drill deeper into fund materials.

Trust and data privacy

Ask Link combines AI-powered document insights with the security, transparency and governance investors expect.

Ask Link is never trained on client data

Responses are based on GP-approved uploaded documents

Source references enable LPs to confirm answers in the supporting materials

Ask Link is designed to support document review, not replace investor judgment or formal review processes

With Ask Link your LPs will be able to:

- Summarize quarterly reports, investor communications and other documents
- Find key capital call details, including dates, amounts and instructions
- Locate valuation updates and other performance data
- Ask where a specific topic is discussed and review the source reference
- Get document-specific answers by focusing questions on a particular file

With Ask Link you'll be able to:

- Meet LP transparency demands by delivering faster, easier access to fund information
- Enable self-service for common document questions while maintaining source context
- Differentiate your investor portal with powerful AI-assisted document intelligence capabilities

See how Ask Link can help LPs seamlessly engage with fund information.
