

SS&C Intralinks for Portfolio Company Reporting Alternative Investments

Managing reams of documentation for every portfolio company, like board communications, KPIs, closing binders and audit information, is a dizzying prospect. It's especially difficult if the firm is relying on unstructured methods, like email or local storage, which can create version-control nightmares.

Intralinks can help private equity firms organize and manage portfolio company information in a single, structured repository with easy, secure access to all documentation for the duration of the investment.

SECURE

Highest level of security, compliance and auditability

SIMPLE

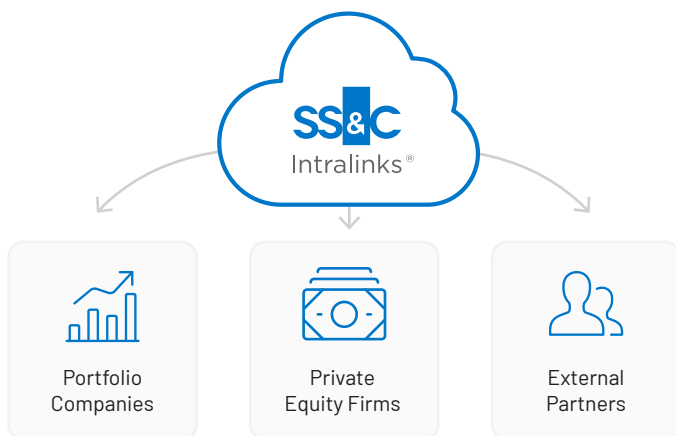

The industry's best, most intuitive platform

TRUSTED

Supporting 3,800 alternative investment firms around the globe

Communicate efficiently with external partners.

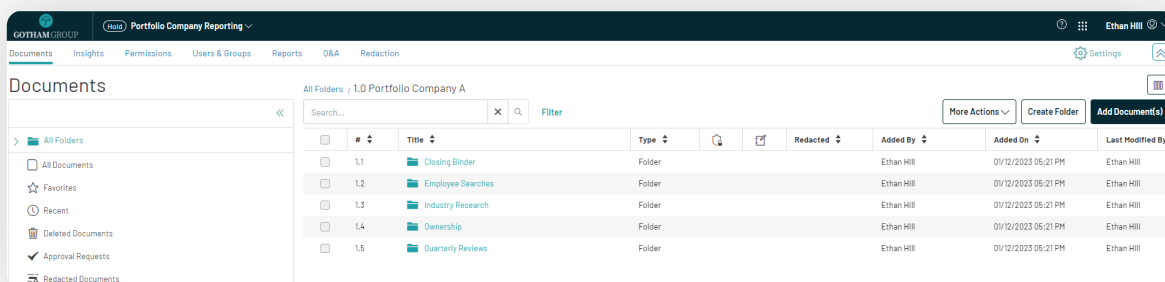

- Maintain strong relationships with your portfolio companies and build trust through faster, more efficient reporting
- Easily manage internal and external users' access to historical documents and data with version control
- Ensure only the right parties have access to essential files with permissioning capabilities

Manage all your portfolio data in one place.

- Capture key portfolio company reports directly from management while simultaneously controlling access to sensitive information
- Receive alerts, and access and comment on files in real time – even while on the go
- Maintain an internal record of all key portfolio company documents, keeping you better prepared for an eventual sales process
- Review key reports using your mobile device

The Intralinks advantage.

- Award-winning customer service model based on direct domain knowledge and industry best practices
- Highest level of security, compliance and auditability – 100% pass rate on more than 280 client-led audits
- Intralinks Mobile App provides anywhere, anytime access to Exchanges
