

# DealCentre for Energy

## Fast-paced dealmaking requires deep energy sector expertise and purpose-built technology

Energy deals are complex, with resource-intensive disclosures that can impede the dealmaking process. Sophisticated CAD files, large well-core log files, seismic data, detailed production facility maps - effective management of these documents ensures that internal teams and counterparties feel minimal friction in moving your deal forward.

With 25 years of experience facilitating M&A transactions in the energy sector, Intralinks provides you unparalleled insights and expertise to manage your deal. At the core of our model is a team of subject matter experts, a group that's supported some of the largest and most complex energy deals in recent history.

Whether it's asset A&D, restructurings, project finance, M&A or fundraising, our capabilities span the spectrum of the energy sector, from renewables focusing on solar and wind power to oil and gas, nuclear, or energy equipment and services.

With the most advanced virtual data room in the market, our platform's unique features are capable of meeting the intense demands of energy transactions:

**Energy sector-specific deal teams** – An extension of your deal team, equipped with deep knowledge of industry trends and best practices. A dedicated, and energy-focused, project manager with unique insight on running due diligence in the energy space, including M&A index templates, all with 24/7 support.

**In-line CAD viewing** – Easy viewing of complex facility maps, engineering and design files, and support for energy files such as well-core logs, seismic data and surveys/ maps allows for diligence to be conducted efficiently and all in one place.

**Video support for Zoom integration** – Seamlessly upload videos like facility tours and management presentations to the VDR in seconds – all within the data room. Advance the asset valuation and inspection process with the only VDR integrated with Zoom.

**Integrated Redaction** – Redact PII and other sensitive content from deal-related documents seamlessly inside the data room, saving time and reducing risk.

**IRM/UNshare™** – Protect sensitive data and retain the ability to recall a document even after a buyer has downloaded it.

Leverage SS&C Intralinks solutions throughout your entire deal lifecycle to accelerate the process and minimize disruption.

## DealMarketing™

Automate outreach to counterparties and manage engagement

## VDRPro™

Prep and execute diligence on the market-leading platform and close your deal faster

## DealVision™

Enable faster counterparty diligence with our AI-assisted platform

Our dedicated energy team will assist you 24/7 until your deal is done.
