

Intralinks for Rule 17g-5 Regulatory Reporting Banking & Securities

Efficiently and securely share critical information

Structured products debt issuance typically involves legal reporting requirements, creating the need to distribute time-sensitive, confidential documents to deal stakeholders. Intralinks® 17g-5 Compliant Virtual Data Rooms (VDRs) streamline the regulatory reporting process.

Maintain compliance and reduce risk

- Distribute documents to hundreds of deal participants while maintaining complete governance over sensitive information
- Minimize the risk of information leaks with a platform that has passed more third-party and client audits than any other VDR provider
- Intralinks is the leading platform for debt financing, helping you mitigate risk and increase productivity

SAFER

17g-5 compliant data rooms with complete auditability

SIMPLER

The industry's best, most intuitive platform

SMARTER

Investor approved (22 years supporting 57k investor organizations)

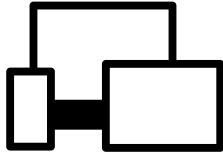

Intralinks 17g-5 Compliant VDRs make it...

Faster for deal participants to get the information they need

Easier to comply with NRSROs ratings guidelines using Q&A

Safer for you to share material information with third parties

Intralinks has features for Rule 17g-5 reporting that allow finance professionals to work smarter and faster, including:

Easy-to-use and intuitive interface

- Brand your VDR with corporate logos and colors throughout the platform
- Upload documents simply and fast from your desktop to an Intralinks Exchange
- Toggle between multiple deals with a single click via the hub screen

Uncompromised security

- Granular and easy to control permissions ensures that the right users have access to the right documents
- Flexible and customizable watermarking saving you time and effort
- One-click to enable and one-click to retract a document with information rights management

24/7/365 end-user support

- Award-winning customer support keeps you up and running, around the world
- Project management and support team with expertise in structured product use cases
- Customer service phone response time is less than 6 seconds

Secure mobile access

- Improve transparency and disclosure with enhanced alert tracking capabilities.
- Alerts can be customized and reissued for ad hoc messaging with success/failure delivery notifications
- Provide participants with secure access to information on-the-go
